Engineering Success Through Mentorship

*Connect.
Empower.*

Lead.

Hello [FIRST NAME],

I am writing today to invite you to be a part of the Baskin Engineering Mentor Collective, which matches undergraduate students proposed as engineering majors at UCSC with STEM professionals who have been in their shoes and can provide support through their first-hand experiences.

We partner with Mentor Collective to deliver this program; they'll be in touch shortly with more information and resources.

Here is a quick rundown of the program:

Matching Process:

- Both mentors and mentees complete a survey detailing their backgrounds, experiences, and hopes for a counterpart. Mentor Collective creates matches based on what students say is most important to them.

Time Commitment:

- Once matched, you will both decide how you want to connect: text, email, video call, or in-person. We recommend you connect with your mentee at least once per month.

Program Timeline:

- This mentorship program will end in Spring of 2026, but you're more than welcome to stay connected with your mentee after the official end of the program.

I'm in! Take me to the matching survey!

As we mentioned, you'll receive another email soon from Mentor Collective. We hope you'll consider it, and do not hesitate to reach out to me with any questions you may have. You can also contact Mentor Collective directly at help@mentorcollective.org or learn more about the Mentor Experience [here](#).

Best,

Erin Busch
